

FRD: Comment widget to support Single Select

Problem Statement

Currently, the text comment widget supports “Text questions” only, and there is no way of getting information on the text entered by users when they use the other option in multi-select questions

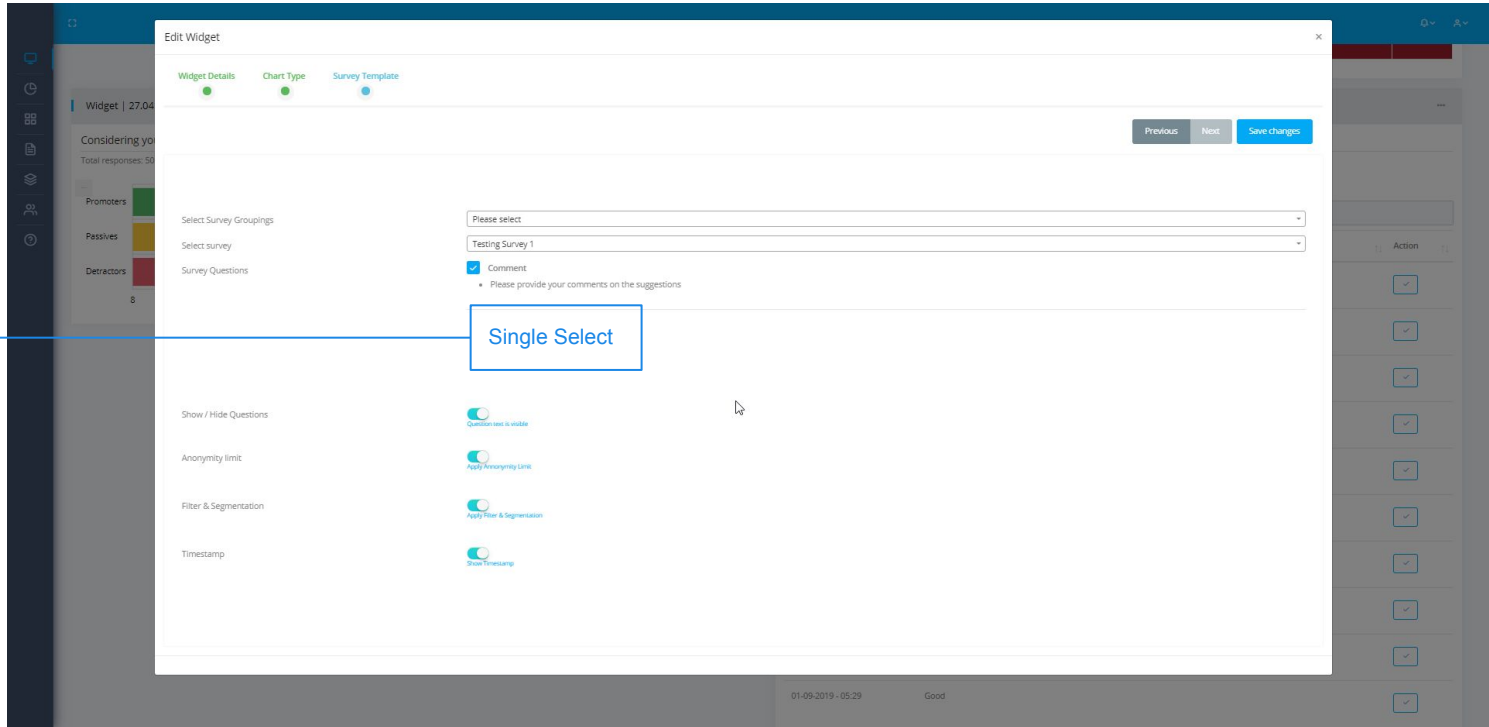

User Stories

- As A XA user who has a multi-select question with other option enabled,
- I want a feature where I can view all the comments entered by the users
- So that I get a complete list of what the users are entering.

Wireframes

Add new widget >> Select Chart >> Text Comment

Allow single select questions to be visible in this list

Check if other option is enabled.

Widget showing only strings entered in other option.

Widget | 04.05.2021 - 10:54:40

Please provide your comments on the suggestions

Additional settings to include dynamic comment

Input

Output

The screenshot shows a widget interface with a header "Widget | 25.05.2021 - 07:27:37". Below the header is a toolbar with buttons for "Copy", "Excel", "CSV", and "PDF". A search bar on the right contains the number "25". The main content is a table with the following structure:

Timestamp	Comments	Action
25-05-2021 - 10:53	This is not good	<input checked="" type="checkbox"/>

Below the table, it states "Showing 1 to 1 of 1 entries (filtered from 33 total entries)". At the bottom right, there are navigation buttons: "Previous", "1" (highlighted in blue), and "Next".

Data from Other option only shown
